CATALOGUE

OF THE

LIBRARY

OF THE

PEABODY INSTITUTE

OF THE CITY OF BALTIMORE

PART II

D–G

BALTIMORE
1885

Press of Isaac Friedenwald,
Baltimore, Md.

NOTE.

This second volume of the catalogue contains 958 pages and 68,902 references. As all additions made to the library during the progress of printing are inserted, when possible, under one or more of the three entries—author, title, subject—a work may often be found under one of these heads and not under the others. When the principal alphabet has been finished, a supplement will be printed, completing these imperfect entries, and bringing the catalogue of the whole library down to the date of its concluding part. It will require not less than three volumes more, of over 900 pages each, to complete the principal alphabet.

EXPLANATION.—The figures that follow the name of an author, indicate the dates of his birth and death, as 1765–1859. When *only one* of these dates can be ascertained, it is inserted, leaving the other blank, as for birth, 1823—, for death, —1823, and, when no exact dates of an *old* author can be found, the *century* in which he lived is generally inserted. These dates, which are annexed to the names of *authors only*, are inserted but once, and that after the author's name in the general alphabet.
